

OVERALL SCORE: **1,0**
CLASS: **MEDIUM**
PRICE/PERFORMANCE: **VERY GOOD**

“ [...] Despite their compact dimensions they prove to be very well suited to deliver well-balanced and room-filling sound - even if they are independently positioned in the room. With their overwhelming presence, they perfectly know how to instantly fascinate and captivate their audience.”

“ [...] The sound is crisp and striking, nothing is missing and nothing is added. However the extremely straightforward and nicely detailed play must not be mixed up with excessive analytics or an unpleasant reproduction of the high frequencies. On the contrary, the sound character of the Humidor can rather be described as “neutral” or “well balanced.”

To sum up:

”The new Magnat Humidor is a compact speaker for discerning connoisseurs: With special attention to detail and made from precious materials, its sophisticated real-wood finish and the harmonious choice of colours are a treat for the eyes. And it is just as impressive for your ears thanks to the carefully developed, high-quality chassis selection. In a nutshell: the Magnat Humidor is, especially in combination with your own tube electronics, the perfect choice for small to mid-size rooms, that need to be stylishly and pleasantly filled with sound. And this in turn invites you to enjoy a night with some good wine, a cigar and your favourite music.“
