

11/22

TEST RESULT: OUTSTANDING

## EXCELLENT ACOUSTICAL COORDINATION

### Display:

“It is a pleasure that it is a color display and during Spotify Connect playback, the cover is displayed in color. The display is excellently legible, even when viewed from the side. The display can be dimmed in three different levels using the remote control or in the main menu.”

“Solid workmanship, very good interior design, practical connection equipment: Magnat’s stereo switching center definitely knows how to convince so far.”

### Sound:

#### Playback of FM / DAB:

“We start the station Radio Bob! on which the Bloodhound Gang is currently performing “Foxtrot Uniform Charlie Kilo”. The dynamic track is reproduced very well, with the necessary momentum and impeccable expressiveness.”

#### Compact Disc Playback:

We like the presentation of the very special voice excellent. It is presented authentically and with clear contour, but without being aggressive. The low-frequency representation is also outstanding; it seems powerful and homogeneous at the same time.”

#### Playback via Spotify Connect:

Continuing with playback via Spotify Connect, we hear “Unholy” by Sam Smith feat. Kim Petras. The track starts with choral vocals that are astonishingly multi-faceted and at the same time neutrally reproduced. We are surprised by the very three-dimensional reproduction.

### Conclusion:

“For a purchase price of 1499 EUR, Magnat offers the MC400 stereo network receiver [...] With a maximum peak power of 100 watts/per channel, the MC400 can put medium-sized floor-standing speakers in the limelight properly. The Magnat stereo network receiver solution also draws from the full in terms of playback options. In addition to a CD player, tuner for FM or DAB+ playback, the MC400 has an integrated network interface. [...] The Magnat MC400 can of course be integrated into a suitable multi-room network. The integration into the home network can be done via WLAN or LAN cable. [...] In the sound test series, the MC400 scored with a very neutral voice reproduction. We were very convinced by the performance of individual instruments as well as an excellent bass range.”
