HIGH-END STREAMER IN A CLASSIC HIFI FORMAT

“The Linkplay-based app is by no means baffling. It is concise and very easy to use. There were no problems during (WiFi) installation, which meant the unit was integrated quickly into our network.”

“The MMS 730 casts an elegant figure. A solid metal housing and a brushed aluminum front panel ensure a coherent overall impression. [...] The high-quality feet on the base of the unit are to be commended.”

“A small, easy-to-use remote control is also supplied. It features proper buttons instead of simple membrane buttons and is made of relatively high-quality plastic.”

Conclusion:

“The Magnat MMS 730 is impressive with its elegant visual appearance, as well as its high-quality materials and workmanship. It can also be conveniently and easily operated by using the Linkplay-based app. The integrated Wolfson D/A converters deliver a precise performance, which ensures a lively and homogeneous sound. The fact that the MMS 730 is not just a streamer, but also comes with a DAB/DAB+ radio tuner and a classic analog tuner, simply enhances its practical value even further. Another good feature is that the unit is supplied with the new Bluetooth standard (version 5.0), which also includes aptX HD.[...]”

“An elegant streamer/DAB radio tuner with a solid configuration and high-quality DAC.”
