

PRECISION & ATTENTION TO DETAIL

Conclusion:

"The Monitor Reference 5A from Magnat represents a powerful active speaker that combines a music system, TV speaker and streaming box in one affordable audio solution. Regardless of whether you're listening to film audio or music, what the Monitor Reference 5A presents here in terms of liveliness for just under 400 euros per speaker is a real delight. When you add wireless music reception, a TV connection and phono input to the mix, it really is deserving of the AV-Magazin Best Buy award."

Sound:

"What can you expect from a pair of active floorstanding speakers for less than 800 euros? A lot as it turns out! Especially when Magnat is behind it. So it's hardly surprising when the sound quality knocks us off our feet. The Monitor Reference 5A produces such a high degree of precision and attention to detail that you can scarcely believe the price tag. The bass range sounds extremely powerful and offers a rich foundation with agile dynamics. And the mid-range is also impressive with its neutral coordination and expressive character. News anchors, song vocals and instruments sound extremely authentic, while the dome garnishes the treble range with a subtle pinch of freshness. The resolution, which is exceptionally high for this price range, helps create an acoustic backdrop that gives audio lovers pure, lasting listening pleasure. Bravo!"

Price/performance:	Outstanding
Sound:	Very good
Configuration:	Very good – outstanding
Operation:	Very good
Overall:	Very good
