

Testresult: **Outstanding**

“... With a solid base and a well-balanced sound playback, even at high frequencies, the Multi Monitor 220 demonstrate what a good choice they are for any music enthusiast who puts emphasis on an excellent price/performance ratio. They deliver a respectable and plain sound quality, which once again is full of finesse. The Magnat transducers precisely reproduce the vocal and instrumental details. They allow a really focussed music experience without any displeasing effects that often occur with budget class systems.”

„The bass elements are being smoothly incorporated and do not play themselves too much into the foreground. At the same time they neither sound boring nor too lean. The Magnat speakers just hit the right spot and care for a well-balanced and dynamic sound reproduction.”

Conclusion:

„The Magnat Multi Monitor absolutely impressed us from an acoustic point of view. Elegant, mature, balanced and rich in detail – we could hardly allocate more praise to a product in this price range. The option to even hook up a record player, is a great idea, considering the growing number of vinyl record fans. The operation is really handy and has delighted us...”

“A sound-wise first class monitor speaker system for a budget price.”
