

“... The Magnat Multi Monitor 220 does not only come with a list of modern features, but it hits the zeitgeist in terms of sound, too. Crystal-clear treble, many details, punchy bass – this is how the active Bluetooth speakers can be described in a few words.”

Conclusion:

“With their active loudspeakers Multi Monitor 220, Magnat definitely helped polishing up the slightly tarnished image of traditional hifi systems. Bluetooth, phono pre-amp, analogue and digital inputs - all possible connection types needed for everyday music and TV consumption are available. Finish, appearance, sound and configuration all perfectly correspond to the price. If you are looking for a bigger system, you should opt for Magnasphere speakers, another active speaker series by Magnat.”

Design / Workmanship: 8 out of 10 points

Mounting / Setup: 9 out of 10 points

Features / Accessories: 9.5 out of 10 points

Sound: 8 out of 10 points

Price / Performance: 9.5 out of 10 points
