

## MAXIMUM AUDIO ENJOYMENT

„[...] Magnat’s unit brings its performance to the fore in the listening room and delivers film audio with a particularly gripping dimension in the lowest registers. Even ultra-low sound effects, such as those in the opening sequence of “Edge of Tomorrow”, are propelled into the listening room by the CS 12 with optimum precision and an enormous degree of emphasis. A small overtone generated by the CS 12 around 65 Hertz provides a physically noticeable feeling of pressure and is extremely enjoyable.”

**Practice:** Score 1.1
