**Magnat RV4
sehr gut**

Testresult: Very good

„...The sound of the RV4 is powerful, straightforward and truly thrilling. The Magnat amplifier delights us with its agile performance and dynamic joy of playing. Whether synthetically generated bass lines and kick drums or hand-plucked string instruments such as string basses and cellos, the RV4 always produces an extremely broadband and potent sound.

Thanks to its high resolution capabilities, the RV4 fully and precisely transmits even ensembles of complex instrumental formation into the listening room. We particularly like the extremely precise stage presentation of that German amplifier, which accurately separates vocals from instruments, without losing focus on the overall musical context. The sound tuning discreetly remains in the background, so that the music will be reproduced by the loudspeakers exactly as it had been recorded.

The RV4 is the perfect amplifier for all music enthusiasts, who prefer a particularly harmonious and powerful sound.“

To sum up:

„With its RV4 Magnat impressively demonstrates how the warm sound from analogue tubes and powerful transistor technology can be joined to form a sonorous symbiosis. Thanks to Bluetooth, a phono amp as well as analogue and digital inputs, it offers numerous application options. And last but not least the RV4 impresses us with its prominent design, that turns it into a one-of-a-kind hifi jewel.“

Sound: **VERY GOOD**

Features: **OUTSTANDING**

Handling: **OUTSTANDING**

Workmanship: **VERY GOOD**

Class: **TOP CLASS**
