

### TO SUM UP:

„If you want to hit the zeitgeist and enjoy the feeling of the good old analogue times, we have just the thing for you.“

„...Hot tubes, warm sound? Not necessarily. Because the Magnat RV 4 offers a high level of homogeneity and organic sound, without being rude in the lower midrange. The neat separation of the stereo channels provides a well-defined sound pattern.“

„...In the bass range this hybrid amplifier reveals a character of great depth and it easily deals with speakers of different sensitivity levels. It is able to literally position bass guitars in the room and makes big kettledrums just sound tight with a substantial portion of dynamics.“

„...The RV 4 also handles harmonics with ease and elegantly avoids to push sibilants and hard consonants too harshly. Delicate recordings, triangles and cymbals equally benefit from its gentle lightness.“

### To sum up:

„Magnat's RV 4 is an ultra-modern amplifier that implies a lot more than the little word ‚tube‘. In terms of sound, its hybrid character cares for the right mix of power and emotion. With Bluetooth and digital inputs the RV 4 offers modern types of connections and even the phono input for turntables is nowadays hip again. If you want to hit the zeitgeist and enjoy the feeling of the good old analogue times, we have just the thing for you.“

**DESIGN/WORKMANSHIP:** 10 out of 10 points

**SETTING-UP:** 9 out of 10 points

**FUNCTIONALITY/ACCESSORIES:** 9 out of 10 points
