

Reference in its price class

“... Magnat thus succeeded in not creating a simple “Me Too“ product, but a top class individual speaker – at an affordable price. The Signature 1105 is subtle and elegant and delivers brilliant and delicate sound. Look and acoustics enter into a first-class symbiosis with each other.”

“... From the very first seconds the high frequency range comes up with an impressive presence and great transparency. Clear and amazingly brilliant trebles are for sure one of the strengths of the new Signature transducers from Pulheim.”

Summing up:

“Technical innovation, an elegant appearance and premium material quality – at a fair price. With the Signature 1105, Magnat has doubtlessly hit the target to launch an exclusive and innovative high-end loudspeaker at a still moderate price. In particular Magnat’s courage to present a truly individual, yet high-quality and sophisticated concept needs to be praised.

On the whole the drivers very harmoniously complement each other and deliver a wide and very spatial sound stage with a clear structure and distinctive differentiation. As one would expect, high-resolution audio material delivers the best results, but conventional recordings will equally thrill the listener.”
