

### Test result:

“With the Multi Monitor 220, Magnat demonstrates what high level of sound quality can be reached nowadays, even with a modest budget, only by reducing a compact system to the essential: good, intelligently equipped speakers. This fully active speaker duo is perfectly suited for all contemporary requirements and delivers, from streaming to vinyl, a clean and natural sound reproduction in best hifi tradition. The fact that this affordable yet sound-intensive ensemble virtually saves the younger generation from the hell of tiny Bluetooth speakers and exposes them to serious music reproduction, is maybe the most important merit of this inconspicuously-looking speaker couple that hides a beast behind its front plate.”
